Surface Studio Project 2: Place Mapping

MATERIALS NEEDED FOR WED. 9/19

We will be showing you how to build your own cradle frame panel, which will be used for our next project. Bring all of the following materials on the 19thth. Assembled cradle frame will be due Mon. 9/24 at 9:30.

1. Go to the lumber aisle at Home Depot, Ace, Lowes, etc. Choose TWO pieces of wood that are 1 in. x 2 in. x 6ft. Select Pine works great and is around \$4. You will need to examine the wood to make sure it is STRAIGHT and in good condition. The wood may not be treated (look for a strange color) and avoid lumber with nails, knots, or blemishes.

2. You will need to go to Homegrown Marketplace to purchase the following:

- Pac Man clamps (corner clamps)
- One 18 x 24 inch piece of masonite

3. Also bring your BLUE TAPE, SANDING BLOCKS, WOOD GLUE & WAX PAPER.
