

WASH / MW Crew

Form Fusions Team Interview & Research:

Due Monday 10/8

Collaborative Team Interview

Successful collaboration requires knowing each other well. Through this interview, you will introduce yourself and note all team member responses to the following collaborative questions. Record this information in your visual journal.

1. How do you define collaboration?
2. What scares you about the collaborative process?
3. What are your strengths?
4. How do you communicate? (exchange numbers and e-mails)
5. How do you handle conflict or stress?
6. How can your team set up boundaries and plan for success?
7. Does anyone on your team need to clear the air about something? Avoid social tension and be kind.
8. How will you divide collaborative roles/responsibilities?
9. What does the conceptual focus mean to you?

Team Research:

Divide the following links among your team. Using your laptops in studio, individually navigate each site and report back to your team with data, ideas, and image inspiration for your specific project. Thoroughly record all findings in your visual journal. How are elements and principles of design being used? How does the work conceptually function? How could this work inform your collaborative project (exterior, interior, surface, building structure, site specificity, craft, concept) Share and discuss your findings with your team.
